PROFESSIONAL SUMMARY

Software Developer with 10+ years in software development and IT, including 4+ years building C#/.NET applications on SQL Server. Proven track record delivering reliable software under HIPAA constraints, automating high-volume manual workflows, optimizing SQL performance, and owning projects end-to-end—from requirements gathering through Azure DevOps CI/CD deployment and production support.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET 6 / .NET 8, ASP.NET, VB.NET, SQL, JavaScript, Java, PHP, HTML, CSS

Data & Databases: Microsoft SQL Server, T-SQL, stored procedures, query optimization & troubleshooting, schema design, MySQL, data migration

Cloud, DevOps & Automation: Microsoft Azure, Azure DevOps, GitHub Actions, Azure Static Web Apps, CI/CD pipelines, Git, workflow automation scripting, Linux administration

Web & APIs: RESTful APIs, React, TypeScript, Vite, Tailwind CSS, AngularJS, jQuery, Bootstrap, Telerik

Practices & Compliance: HIPAA-regulated systems, secure coding (TLS), Agile/Scrum, unit testing, OOP, SDLC, requirements gathering, technical documentation, production troubleshooting

PROFESSIONAL EXPERIENCE

Baker Tilly | Madison, WI | 2022 – 2025

Software Developer

- Built and maintained core business applications in C#, ASP.NET, and .NET 6/8 on SQL Server used daily by hundreds of staff to run essential operations.
- Developed automation tools that replaced manual workflows, eliminating thousands of work hours annually and reducing process errors.
- Optimized and troubleshot SQL Server queries, stored procedures, and schemas, cutting key query runtimes from 15 minutes to 30 seconds and maintaining reliability as data volumes increased.
- Designed and built a secure RESTful API integration for third-party data exchange, and consumed RESTful APIs across internal applications.
- Built and maintained Azure DevOps CI/CD pipelines that automated builds, testing, and deployments, reducing manual release effort and defects.
- Architected modular application structures that enabled new features without full-system rewrites, improving long-term maintainability.
- Modernized legacy applications to current .NET standards and secure coding practices, strengthening security, performance, and supportability.

Group Health Cooperative | Eau Claire, WI | 2021 – 2022

Software Developer

- Designed, developed, and shipped C# / .NET applications on SQL Server through the full SDLC at a HIPAA-regulated health insurer.
- Delivered production releases via Azure DevOps with rigorous testing and debugging to meet strict quality, privacy, and HIPAA compliance standards.
- Partnered directly with stakeholders and cross-functional teams to gather requirements and translate them into reliable, production-ready software.
- Built internal tools and system enhancements that significantly reduced operational costs while maintaining high availability.

Phillips-Medisize Corp. / Molex Inc. | Eau Claire, WI | 2013 – 2021

Development Specialist (2014 – 2021) | *Help Desk Intern (2013)*

- Automated a company-wide data migration through large-scale extraction and transformation scripting, eliminating hundreds of hours of manual effort.

- Scoped requirements for third-party developers and coordinated delivery of custom solutions on schedule and to specification.
- Maintained and enhanced an intranet and internal web applications supporting 1,000+ employees; modernized legacy PHP/MySQL code for improved reliability and performance.
- Designed SharePoint sites and automated workflows that streamlined collaboration, document management, and business processes organization-wide.
- Authored technical documentation and delivered one-on-one training that drove user adoption of new tools and systems.
- Diagnosed and resolved hardware, software, networking, and ERP issues across departments, triaging tickets to minimize downtime (Help Desk).

PROJECTS & SELF-HOSTED INFRASTRUCTURE

- Personal portfolio site (React, TypeScript, Vite, Tailwind CSS), with automated linting, type checks, and tests in GitHub Actions CI, deployed to Azure Static Web Apps; Lighthouse scores 97 performance and 100 accessibility, best practices, and SEO.
- Design, deploy, and administer self-hosted Linux servers and a home virtualization lab, including provisioning, networking, firewalls, security hardening, automated backups, and monitoring.
- Manage DNS, reverse proxies, and secure remote access; independently troubleshoot performance, connectivity, and reliability issues using production-grade practices.

EDUCATION & CERTIFICATIONS

B.S., Software Development — Western Governors University, 2025

A.S., Software Development — Chippewa Valley Technical College, 2014

Certifications: CompTIA A+ (2025), CIW Advanced HTML5 and CSS3 Specialist (2020), CIW User Interface Designer (2020)
